

Clinical Psychology Section 03 PSYC 160

Spring 2023 3 Unit(s) 01/25/2023 to 05/15/2023 Modified 01/21/2023

Contact Information

Instructor:	Jennifer Gregg, Ph.D.
Class Days/Time:	Tuesdays and Thursdays 10:30 - 11:45am
Class Location:	Engineer Building 341
Telephone:	Please use email to reach me
Email:	Jennifer.gregg@sjsu.edu
Office Hours:	Tuesdays and Thursdays 2:00pm to 3:00pm via zoom or in DMH 317

Course Description and Requisites

Survey of clinical psychology as a profession. Emphasis placed on training models, specializations within the field, the scientific study of psychological interventions, and the graduate school admissions process for masters and doctoral level psychotherapists.

Prerequisite: PSYC 001.

Letter Graded

* Classroom Protocols

This classroom is a professional environment for you, and should be treated that way. There is a lot of interaction in this class, both with the professor and with your fellow students in groups, so professionalism on your part is very important. Here are some basic guidelines, for those of you who have little experience in a professional context:

- Turn your phone on silent before class begins and never, ever take it out during class or when you are engaged with your group members. If you have an emergency, please excuse yourself and go out of the room..
- When communicating with me by email, please be professional.
- Please be respectful of the thoughts, opinions, and experiences of others. Many of the topics in this class may have personal significance to some students. Please make a special effort to listen to one another – particularly while in the groups.

Program Information

Program learning outcomes (PLOs) are skills and knowledge that students will have achieved upon completion of the Psychology BA degree. Each course in our curriculum contributes to one or more of these PLOs. The PLOs for the Psychology BA degree are:

1. Knowledge Base of Psychology. Students will be able to demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends in psychology.
2. Research Methods in Psychology. Students will be able to design, implement, and communicate basic research methods in psychology, including research design, data analysis, and interpretations.
3. Critical Thinking Skills. Students will be able to use critical and creative thinking, skeptical inquiry, and a scientific approach to address issues related to behavior and mental processes.

4. Applications of Psychology. Students will be able to apply psychological principles to individual, interpersonal, group, and societal issues.
Values in Psychology. Students will value empirical evidence, tolerate ambiguity, act ethically, and recognize their role and responsibility as a member of society.

Course Goals

This course is designed to introduce you to the field of clinical psychology. Over this semester we will discuss the history of clinical psychology and how the field has come to the place where it is today, the major tasks of a clinical psychologist, and current issues in the field as it moves forward in the healthcare industry.

Most importantly, this course will provide an opportunity for you to practice critical thinking skills in the application of science and evidence-based practices in psychology. Since students learn these skills most efficiently in collaboration with others (Gokhale, 1995), there will be an emphasis on working together to learn content, critical thinking, and application throughout this course.

Course Learning Outcomes (CLOs)

Upon successful completion of this course, students will be able to:

- CLO1: demonstrate understanding of the historical and contextual roots of clinical psychology and their impact on its current role in the healthcare system
- CLO2: show a familiarity with the major models used in the assessment, classification, and treatment of psychological problems
- CLO3: think critically about the major issues in the field of clinical psychology, including the role of cultural issues in assessment and treatment, training models, and scientific accountability of clinical practice.

Course Materials

Textbook:

Clinical Psychology, Science Practice, and Diversity, 5th Edition (only use 5th edition)

Andrew M. Pomerantz 2020

ISBN-10 : 1544333617

ISBN-13 : 978-1544333618

Course Requirements and Assignments

Assignments

Assignments for this course will consist of the following:

12 quizzes 10 questions, 20 points per quiz, 220 total quiz points (lowest dropped)

2 exams 200 points total

1 paper 25 points total

445 points possible in the course

Quizzes

Each topic area in this class will have two (10-item) in-class quizzes at the beginning of the class date where the topic is begun. The first quiz will be taken individually, and the second quiz will be the exact same quiz, taken in a group. Quizzes will be multiple-choice style and will be based on the assigned readings. Both types of quizzes are closed-book and notes will not be permitted.

Each set of quizzes is worth 20 points, and your score will be determined by averaging your individual quiz score and your group quiz score. The lowest individual/group combination score will be dropped. Note that this does not mean that your lowest individual quiz and your lowest group quiz will be dropped, but that the lowest two-quiz topic score will be dropped to allow for an unavoidable missed class or a rough night. A total of 260 points possible will be available from your quiz scores, leaving 240 total possible points after the lowest is dropped. If you do not turn in the individual quiz, you will get 0/10 plus your group score, and if you miss class on the day of an individual/group quiz, you will get a 0/20.

These quizzes are meant to stimulate your reading of the text and keep you ahead of the lecture material. Your having completed the reading in advance will make the lecture and discussions much more interesting. I promise.

Exams

There will be 2 exams. The exams will cover both readings from the text and class lectures. The exams will be multiple-choice format and will have 50 questions. You will need a scantron (Form 882-E) for each exam. Each exam will be given during the lecture period, and you will have 1 hour and 10 minutes to complete the exam.

You will be allowed to re-schedule an exam only for medical reasons or if you have a mandatory school activity (both require documentation). Please contact me prior to the day of the exam if you cannot make the exam time. The final exam will count the same as any other exam. The final will **not** be cumulative.

Paper

There will be one paper assignment in this class. This paper will be a short (2-3 page) description of your career goals, due in the third week of the semester. The purpose of this paper will be to focus your thinking about your own career priorities in this and other classes, and allow you to expand and contrast your interests with the topics discussed over the course of this class. Late papers will receive a 10% penalty per day (highest grade possible for a late paper is 90% then 80%, etc). This paper is worth 25 points.

Career Paper Rubric				
Criteria	Ratings			Points
Description of Career Goals	Full description of future career goal or goals, including full description of what this career would entail	Incomplete description of career goal or goals	No description of career goal or goals	10 points
	10 points	8 points	0 points	

✓ Grading Information

Determination of Grades

Grading is based on the sum of the following (there is no extra credit available for this course unless announced by the professor during the semester):

13 quizzes 20 points per quiz, 240 total points (lowest score dropped) - **52% of final grade**

2 exams 200 points total - **43% of final grade**

1 paper 25 points total - **5% of final grade**

465 points possible in the course

Grading Policy

A+ = 100-97%	A = 96-93%	A- = 92-90%
B+ = 89-87%	B = 86-83%	B- = 82-80%
C+ = 79-77%	C = 76-73%	C- = 72-70%
D+ = 69-67%	D = 66-63%	D- = 62-60%
F = 59-0% Unsatisfactory		

University Policies

Per [University Policy S16-9](http://www.sjsu.edu/senate/docs/S16-9.pdf) (<http://www.sjsu.edu/senate/docs/S16-9.pdf>), relevant university policy concerning all courses, such as student responsibilities, academic integrity, accommodations, dropping and adding, consent for recording of class, etc. and available student services (e.g. learning assistance, counseling, and other resources) are listed on [Syllabus Information web page](https://www.sjsu.edu/curriculum/courses/syllabus-info.php) (<https://www.sjsu.edu/curriculum/courses/syllabus-info.php>) (<https://www.sjsu.edu/curriculum/courses/syllabus-info.php>). Make sure to visit this page to review and be aware of these university policies and resources.
